

Columbia Basin Collaborative Predation Work Group

September 28th, 2022

Zoom Features

- If you have not **connected your audio**, click on the “Join Audio” at the bottom left of your screen.
- To **switch to phone**, click the arrow next to the microphone icon and select “Switch to Phone Audio”.
- If you have joined by browser, please click “Audio Settings”

For technical support, please contact Angela Hessenius

Zoom Features

Keep yourself on mute when not speaking.

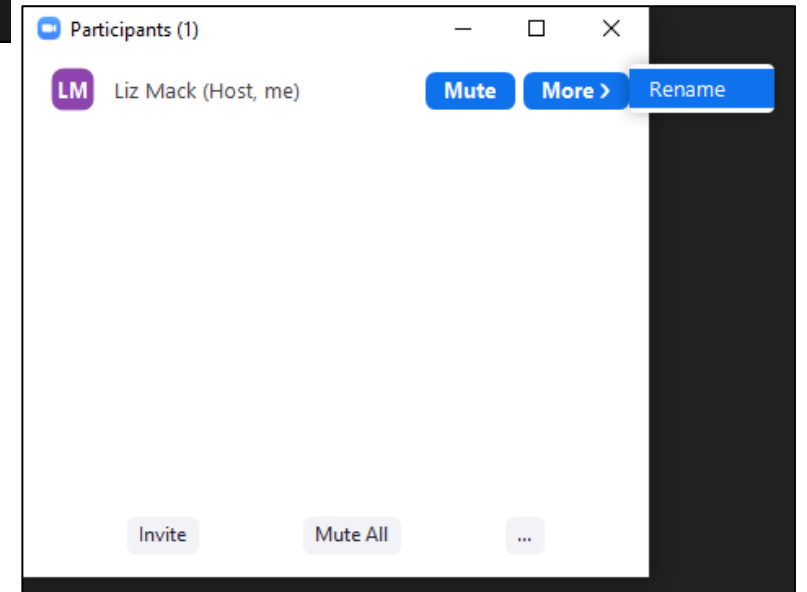

Use video, if possible, to promote face to face communication.

If needed rename yourself in the participant panel.

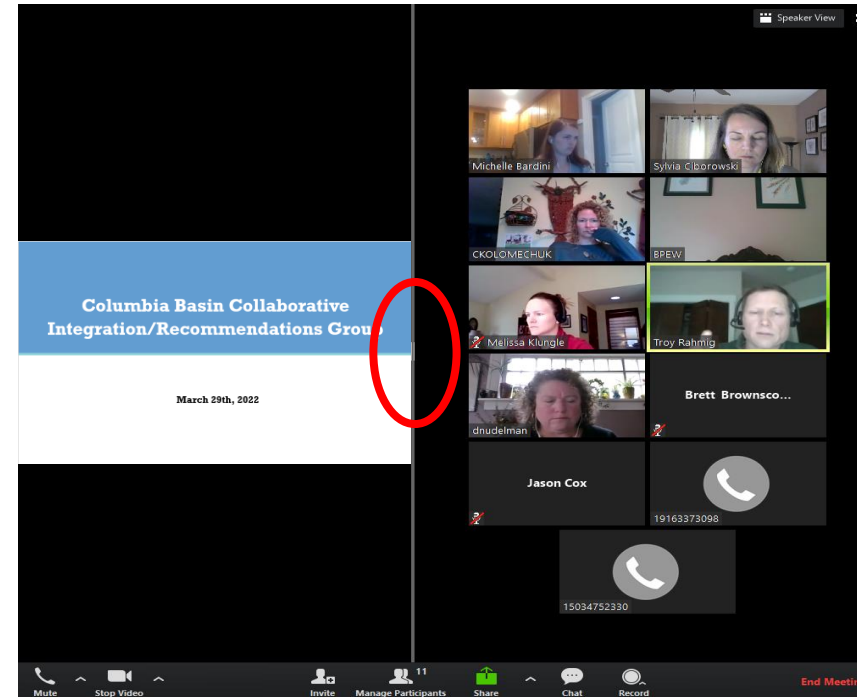

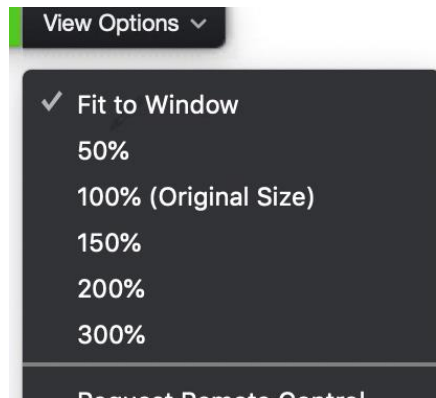

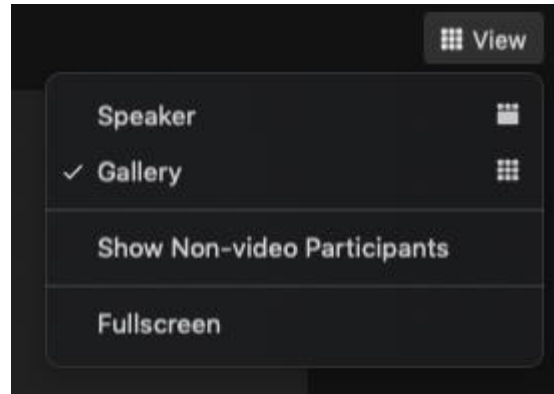

Find your raise hand function at the bottom of your screen

Zoom Features

Adjust view options

For technical support, please contact Angela Hessenius

Welcome, Ground Rules, and Proposed Agenda

Collaboration

Focus on your interests, not positions

Positions are a particular stance,
“What I want”

Interests are the intangible motivation
underlying your stance,
“Why I want what I want”

Collaboration

Invent options for mutual gain

- Work for creative solutions
- Increase the size of the pie

Collaboration

Separate the people from the problem

- Put yourself in others' shoes
- Recognize and understand others and your own emotions
- Build a working relationship
- Be hard on the problem, soft on people!

Meeting Guidelines

- Honor the agenda
- Listen to understand and ask questions to clarify
- Balance speaking time
- Don't pile on
- Be hard on the problems, soft on the people
- Seek alignment and common ground wherever possible
- Be present

Agenda Review

Time (PT)	Topic
1:00 – 1:15 pm	Welcome, Opening Remarks, and Agenda
1:15 – 1:40 pm	Overview and Context of Predation in Columbia Basin
1:40 – 2:25 pm	Discussion of Resources and Gaps
2:25 – 2:50 pm	Work Plan and Next Steps
2:50 – 3:00 pm	Confirm Next Steps, Upcoming Meeting Topics, and Summary

Introductions

- Name
- Affiliation and expertise
- Hope to accomplish or bring into the discussion
- Favorite fall activity – *put it in the jamboard!*

Columbia Basin Collaborative Overview

Integration/Recommendations Group Membership

Tribe
Burns Paiute Tribe
Coeur d'Alene Tribe
Confederated Tribes of the Colville Reservation
Confederated Tribes of the Grand Ronde
Confederated Tribes of the Umatilla Indian Reservation
Confederated Tribes of Warm Springs
Cowlitz Indian Tribe
Fort McDermitt Paiute and Shoshone Tribe
Nez Perce Tribe
Shoshone-Paiute Tribes
Spokane Tribe of Indians
Yakama Nation

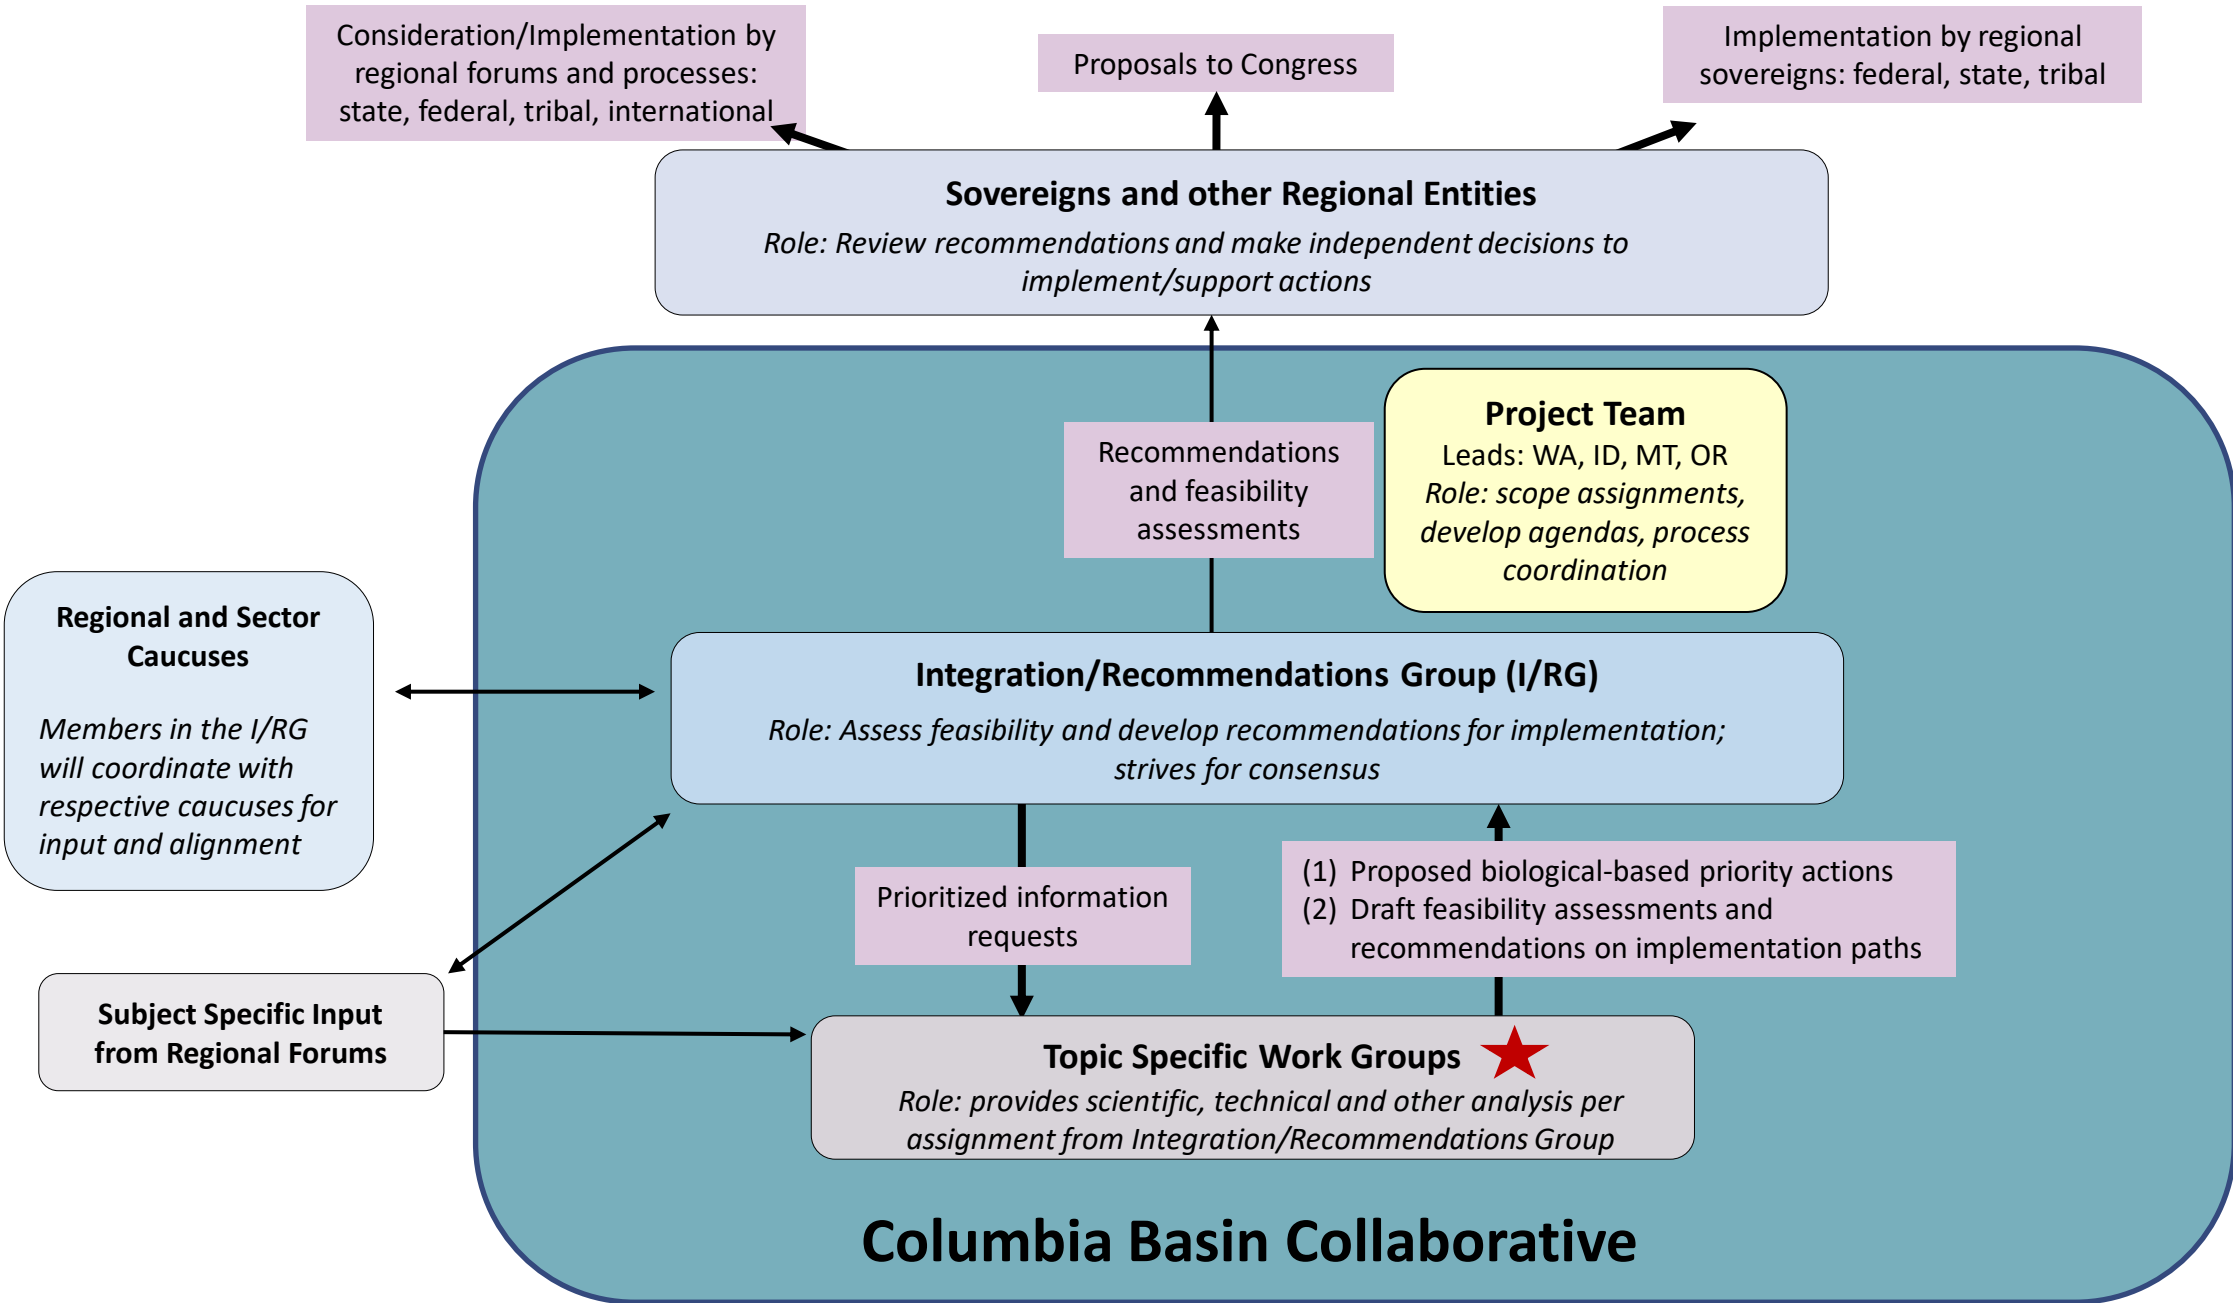

*Invited but not confirmed

Federal entity
NOAA National Marine Fisheries
Federal action agencies: BPA, Army Corps, and/or Bureau of Reclamation
Columbia Basin Federal Caucus

States
State of Idaho
State of Montana
State of Oregon
State of Washington

Sector	Primary Representative	Alternate Representative
Utilities	Seattle City Light	Western Montana G&T
Utilities	Benton PUD	Idaho Consumer-Owned Utilities Association
Non-tribal fisheries	Coastal Trollers Association	Commercial Salmon Fisherman
Non-tribal fisheries	Northwest Sportfishing Industry Association	Idaho Wildlife Federation
River Economies	Idaho Water Users	Kittitas Reclamation District
River Economies	Port of Lewiston	Wheat Farmer
Conservation	Salmon Safe	American Rivers
Conservation	Trout Unlimited	Northwest Energy Coalition

A regional approach to achieving the Columbia Basin Partnership goals

GOAL 1. Restore salmon and steelhead in the Columbia Basin to healthy and harvestable levels.

Subgoals	Within 25 years	Within 50 years	Within 100 years
1-A. Prevent Declines: Reverse and prevent declines of both listed and unlisted salmon and steelhead.	a. Reverse and prevent declines of both listed and unlisted salmon and steelhead.		
1-B. Achieve ESA Delisting: Recover ESA-listed salmon and steelhead to a point where they are no longer threatened or endangered.	a. Achieve ESA delisting for at least some salmon ESUs and steelhead DPSs.	b. Achieve ESA delisting for additional salmon ESUs and steelhead DPSs.	c. Achieve ESA delisting for all listed salmon and steelhead.
1-C. Achieve Broad Sense Recovery: Restore listed and unlisted salmon and steelhead to healthy and harvestable levels.	a. Make significant, measurable progress toward broad sense recovery of all salmon and steelhead.	b. Achieve healthy and harvestable levels for some salmon and steelhead.	c. Achieve healthy and harvestable levels for all salmon and steelhead.

Work Groups

- Estuary/Tributary Habitat
- Hatcheries/Harvest
- Hydrosystem (mainstem and blocked areas)
- **Predation**
- Science Integration Work Group

Predation Work Group Membership

Columbia River Inter-Tribal Fish Commission
Confederated Tribes of the Colville Reservation
Idaho Department of Fish and Game
Idaho Outfitters and Guides Association
Kalispel Tribe of Indians
Lower Columbia Fish Recovery Board
Nez Perce Tribe Department of Fisheries
Resources Management
NOAA National Marine Fisheries Service
Orca Conservancy

Oregon Department of Fish and Wildlife
Trout Unlimited
US Army Corps of Engineers
US Bureau of Reclamation
US Fish and Wildlife Service - Migratory
Birds
US Geological Survey
Washington Department of Fish and
Wildlife
Yakama Nation Fisheries

Purpose of Work Groups

- **Develop draft recommendations** for actions, and assist the I/REG in feasibility assessments of those actions
- **Work collaboratively** to clarify and assess subject-specific issues and potential actions and solutions
- **Leverage existing data and studies** to support their assessments
- **Coordinate and collaborate** across other Work Groups for complementary analyses and solutions

Action Type	Steps	Description	Status/Schedule	Responsible Group	Deliverable
CBPTF Technical Planning	1) Define Fish Goals	ESTABLISH GOALS Identify current status and L, M & H goals by species and by sub-region based on historic data and available habitat	Completed in 2019 as part of CBPTF Ph I	Developed by CBPTF consultant and sub-region tech teams and agreed upon by Task Force members	CBPTF Phase 1 Report
	2) Define Current Fish Mortalities	IDENTIFY FISH LOSSES Quantify anthropogenic fish mortality factors throughout life history by species and by sub-region (summarized on "heat map")	Completed in 2020 as part of CBPTF Ph II	Developed by CBPTF consultant and sub-region tech teams and agreed upon by Task Force members	CBPTF Phase 2 Report
	3) Develop Salmon Analyzer Predictive Model	CONSTRUCT "SLIDER" MODEL Develop model with variable restoration components and levels to predict fish restoration action responses and level of goal achievement by species	Completed in 2020 as part of CBPTF Ph II	Developed by CBPTF consultant and sub-region tech teams and agreed upon by Task Force members	Salmon Analyzer Predictive Model
CBC Technical Planning	4) Confirm science-based approach for working groups	CONFIRM BIOLOGICAL FOUNDATION Review and confirm matrices that use the data from the CBPTF to serve as the foundation of the working groups	April 2022- June 2022	Biological Sub-group	- Biological Matrices - Approach for TSWGs
	5) Identify Needs for: - Tributary Habitat - Mainstem Hydro - Blocked Areas - Estuary Habitat - Predation - Hatcheries - Harvest - Integration across threat categories	IDENTIFY ACTIONS/PROJECTS BY TOPIC - Using CBPTF tools and data, identify priority restoration actions/programs that address impact reduction need for each respective mortality factor and collaborate with existing forums (for example, regional recovery organizations) and the IRG as needed - Consider recommendations, actions, and shovel-ready projects from existing forums (for example the CBPTF P2 report) - Consider actions that benefit multiple stocks and regions/watershed populations - Estimate mortality magnitude, source, and location	Ongoing starting July 2022	Topic Specific work groups	List of actions to address needs
		- Acknowledging tribal and treaty rights and legal constraints			
		IDENTIFY ACTIONS/PROJECTS INTEGRATED PACKAGES Using CBPTF tools and data as well as additional information to look across threat categories to identify cross-cutting actions to achieve L/M/H	Ongoing starting July 2022	Science Integration work group	List of actions to address needs

Life-cycle predation mortality

Shrink the Bar

Sources of Predation – for CRB stocks

AVIAN

MARINE MAMMAL

PISCINE

CBP Focus Species

CASPIAN TERNS, DOUBLE-CRESTED CORMORANTS, CA AND RING-BILLED GULLS

CALIFORNIA SEA LIONS, STELLER SEA LIONS, SEALS, *ORCAS**

NORTHERN PIKEMINNOW, WALLEYE, SMALLMOUTH BASS

CBP Broad Measures to Address Predation

Lethal

- Tactical and targeted (high impact individuals and repeat offenders)
- Partial reduction (sub-population level)
- Population scale management (Incentive Programs, regulation modifications)

Non-lethal

- Infrastructure removal and modification (grates, exclusions, bypass, docks, wires, ...)
- Predator relocation and discouragement (trapping, hazing, ...)

Environmental

- Change conditions to lower predator effectiveness

Existing Predation Management Programs and Infrastructure

Avian - Birds

- Caspian terns on East Sand Island - 2008
- Inland Avian Predation Management Program – 2014
- Double-crested cormorants on East Sand Island - 2015

Pinniped – Sea Lions and Seals

- California Sea lion removals at Bonneville Dam - 2008
- California Sea lion removals at Willamette Falls – 2018
- Steller Sea lion removals and place based management - 2020

Piscine - Fish

- Northern Pikeminnow Removals – 1991
- Bass and walleye bag and size limits lifted - 2016

Predation

Discussion of Resources and Gaps

- Are there other existing forums programs currently operating we haven't covered?
- Are existing forums and programs effective, delivering desired results, and/or having unintended consequences?
- What types of programs have (or would have) the largest return on investment (i.e., what shrinks bars the most, or what shrinks the most bars simultaneously)?
- What resources exist currently? What programs need more resources? Are there resources out there that are not currently being tapped?
- What existing data, research, and studies are already out there that the group can form recommendations?

Work Plan, Next Steps, and Summary

Next Steps

- Summarize existing programs and effectiveness
- Survey the types of programs that would build a large return on investment (Programs that work)
- Develop research/data collection requests
- Develop budget requests

Thank you ~
