

Columbia Basin Collaborative Estuary and Tributary Work Group

September 20th, 2022

Zoom Features

- If you have not **connected your audio**, click on the “Join Audio” at the bottom left of your screen.
- To **switch to phone**, click the arrow next to the microphone icon and select “Switch to Phone Audio”.
- If you have joined by browser, please click “Audio Settings”

For technical support, please contact Colin Johnson

Zoom Features

Keep yourself on mute when not speaking.

Use video, if possible, to promote face to face communication.

If needed rename yourself in the participant panel.

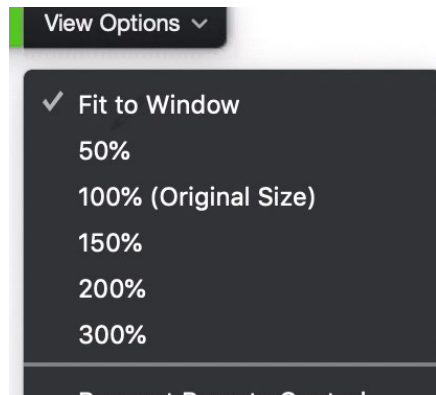

Find your raise hand function at the bottom of your screen

Adjust view options

For technical support, please contact Colin Johnson

Welcome, Ground Rules, and Proposed Agenda

Collaboration

Focus on your interests, not positions

Positions are a particular stance,
“What I want”

Interests are the intangible motivation
underlying your stance,
“Why I want what I want”

Collaboration

Invent options for mutual gain

- Work for creative solutions
- Increase the size of the pie

Collaboration

Separate the people from the problem

- Put yourself in others' shoes
- Recognize and understand others and your own emotions
- Build a working relationship
- Be hard on the problem, soft on people!

Meeting Guidelines

- Honor the agenda
- Listen to understand and ask questions to clarify
- Balance speaking time
- Don't pile on
- Be hard on the problems, soft on the people
- Seek alignment and common ground wherever possible
- Be present

Agenda Review

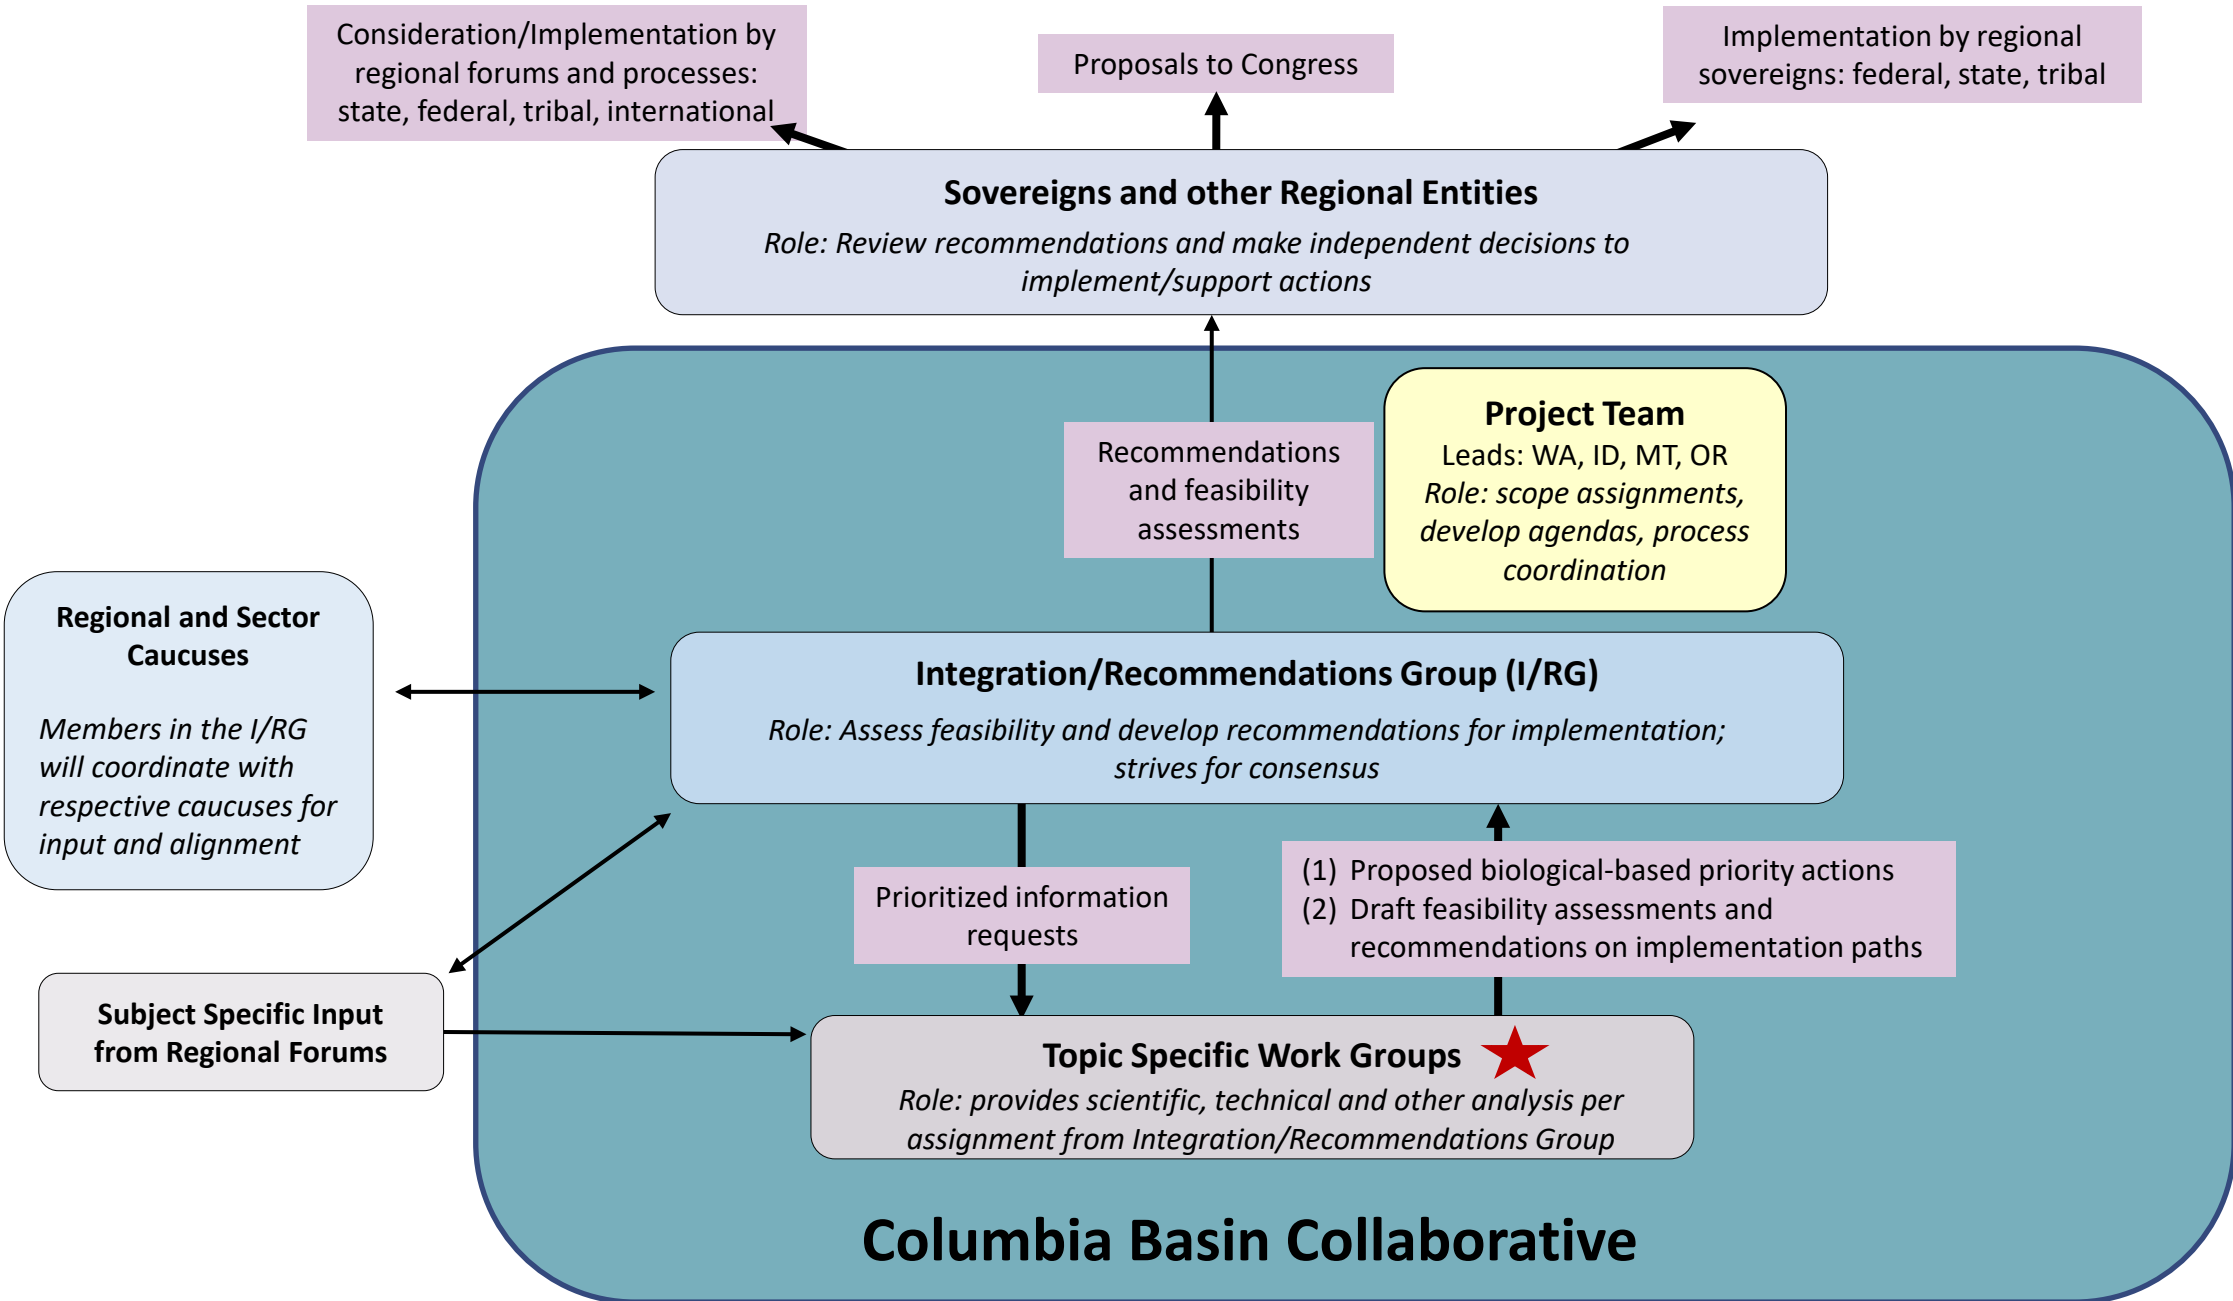

| Time (PT) | Topic |
|---------------------|--|
| 9:00 – 9:15 am | Welcome, Opening Remarks, and Agenda |
| 9:15 – 9:30 am | Overview and Context |
| 9:30 – 9:40 am | Columbia Basin Partnership Data |
| 9:40 – 10:15 am | Estuary Habitat Discussion of Resources and Gaps |
| 10:15 – 10:25 am | Break |
| 10:25 – 11:20 am | Tributary Habitat Discussion of Resources and Gaps |
| 11:20 – 11:45 am | Work Plan and Next Steps |
| 11:45 am – 12:00 pm | Confirm Next Steps, Upcoming Meeting Topics, and Summary |

Introductions

- Name
- Affiliation and expertise
- Hope to accomplish or bring into the discussion
- Favorite fall activity – *put it in the jamboard!*

Columbia Basin Collaborative Overview

A regional approach to achieving the Columbia Basin Partnership goals

Integration/Recommendations Group Membership

| Tribe |
|--|
| Burns Paiute Tribe |
| Coeur d'Alene Tribe |
| Confederated Tribes of the Colville Reservation |
| Confederated Tribes of the Grand Ronde |
| Confederated Tribes of the Umatilla Indian Reservation |
| Confederated Tribes of Warm Springs |
| Cowlitz Indian Tribe |
| Fort McDermitt Paiute and Shoshone Tribe |
| Nez Perce Tribe |
| Shoshone-Paiute Tribes |
| Spokane Tribe of Indians |
| Yakama Nation |

*Invited but not confirmed

| Federal entity |
|--|
| NOAA National Marine Fisheries |
| Federal action agencies: BPA, Army Corps, and/or Bureau of Reclamation |
| Columbia Basin Federal Caucus |

| States |
|---------------------|
| State of Idaho |
| State of Montana |
| State of Oregon |
| State of Washington |

| Sector | Primary Representative | Alternate Representative |
|----------------------|---|--|
| Utilities | Seattle City Light | Western Montana G&T |
| Utilities | Benton PUD | Idaho Consumer-Owned Utilities Association |
| Non-tribal fisheries | Coastal Trollers Association | Commercial Salmon Fisherman |
| Non-tribal fisheries | Northwest Sportfishing Industry Association | Idaho Wildlife Federation |
| River Economies | Idaho Water Users | Kittitas Reclamation District |
| River Economies | Port of Lewiston | Wheat Farmer |
| Conservation | Salmon Safe | American Rivers |
| Conservation | Trout Unlimited | Northwest Energy Coalition |

Topic Specific and Science Integration Work Groups

Work Groups

- **Estuary/Tributary Habitat**
- Hatcheries/Harvest
- Hydrosystem (mainstem and blocked areas)
- Predation
- Science Integration Work Group

Purpose of Work Groups

- **Develop draft recommendations** for actions, and assist the I/REG in feasibility assessments of those actions
- **Work collaboratively** to clarify and assess subject-specific issues and potential actions and solutions
- **Leverage existing data and studies** to support their assessments
- **Coordinate and collaborate** across other Work Groups for complementary analyses and solutions

Estuary and Tributary Habitat Work Group

- Yakama Nation Fisheries
- Umatilla Tribes
- Burns Paiute Tribe
- Colville Tribes
- Nez Perce Tribe
- Cowlitz Indian Tribe
- Spokane Tribe of Indians
- Confederated Tribes of Umatilla Indian Reservation
- US Geological Survey
- US Army Corps of Engineers
- Bureau of Reclamation
- NOAA Fisheries
- Snake River Salmon Recovery Board
- Lower Columbia Fish Recovery Board
- Upper Columbia Fish Recovery Board
- Columbia River Intertribal Fish Commission
- Orca Conservancy
- Idaho Office of Species Conservation
- Idaho Conservation League
- Quincy-Columbia Basin Irrigation District
- Lower Columbia River Estuary Partnership
- Oregon Dept. Of Fish and Wildlife
- Washington Dept. Of Fish and Wildlife
- Bonneville Power Administration

| Action Type | Steps | Description | Status/Schedule | Responsible Group | Deliverable |
|--------------------------|---|---|--|---|---|
| CBPTF Technical Planning | 1) Define Fish Goals | ESTABLISH GOALS Identify current status and L, M & H goals by species and by sub-region based on historic data and available habitat | Completed in 2019 as part of CBPTF Ph I | Developed by CBPTF consultant and sub-region tech teams and agreed upon by Task Force members | CBPTF Phase 1 Report |
| | 2) Define Current Fish Mortalities | IDENTIFY FISH LOSSES Quantify anthropogenic fish mortality factors throughout life history by species and by sub-region (summarized on "heat map") | Completed in 2020 as part of CBPTF Ph II | Developed by CBPTF consultant and sub-region tech teams and agreed upon by Task Force members | CBPTF Phase 2 Report |
| | 3) Develop Salmon Analyzer Predictive Model | CONSTRUCT "SLIDER" MODEL Develop model with variable restoration components and levels to predict fish restoration action responses and level of goal achievement by species | Completed in 2020 as part of CBPTF Ph II | Developed by CBPTF consultant and sub-region tech teams and agreed upon by Task Force members | Salmon Analyzer Predictive Model |
| CBC Technical Planning | 4) Confirm science-based approach for working groups | CONFIRM BIOLOGICAL FOUNDATION Review and confirm matrices that use the data from the CBPTF to serve as the foundation of the working groups | April 2022- June 2022 | Biological Sub-group | - Biological Matrices - Approach for TSWGs |
| | 5) Identify Needs for: - Tributary Habitat - Mainstem Hydro - Blocked Areas - Estuary Habitat - Predation - Hatcheries - Harvest - Integration across threat categories | IDENTIFY ACTIONS/PROJECTS BY TOPIC - Using CBPTF tools and data, identify priority restoration actions/programs that address impact reduction need for each respective mortality factor and collaborate with existing forums (for example, regional recovery organizations) and the IRG as needed - Consider recommendations, actions, and shovel-ready projects from existing forums (for example the CBPTF P2 report) - Consider actions that benefit multiple stocks and regions/watershed populations - Estimate mortality magnitude, source, and location | Ongoing starting July 2022 | Topic Specific work groups | List of actions to address needs |
| | | - Acknowledging tribal and treaty rights and legal constraints | | | |
| | | IDENTIFY ACTIONS/PROJECTS INTEGRATED PACKAGES Using CBPTF tools and data as well as additional information to look across threat categories to identify cross-cutting actions to achieve L/M/H | Ongoing starting July 2022 | Science Integration work group | List of actions to address needs |

Estuary Habitat

Discussion of Resources and Gaps

- What existing forums are currently operating?
- What resources exist currently? What programs need more resources?
- What existing data, research, and studies are already out there that the group can form recommendations on?

Break

10 minutes

Tributary Habitat

Discussion of Resources and Gaps

- What existing forums are currently operating?
- What resources exist currently? What programs need more resources?
- What existing data, research, and studies are already out there that the group can form recommendations on?

Work Plan, Next Steps, and Summary

Next Steps

- Compile the brainstorm - filter the information through a lens on the bio matrices
- Review the “story” behind specific stocks
- Request IRG to clarify:
 - What level of recommendations/actions?
 - What level of restoration is needed to achieve the goals?
 - Should we identify implementers, partners, and collaborators in the work?
- Use the NOAA 5 year reviews to assess priorities (stocks, areas) for the next five years – including adding specificity to generalized recommendations.
 - Distill down into short term and long term – restoration, protection related actions.
 - Ranking priorities

Thank you ~
